V-FR

V-FR Your questions answered

* What skin types are treatable?

Due to V-FR's advanced SVC™ technology, all skin types can be treated, throughout the year.

* Which areas can be treated?

With the ability to target different depths in the skin, V-FR's treatments can address every facial and body part, including areas traditionally difficult to treat, such as hands, décolleté, and bony areas like the forehead.

* Are treatments painful?

No, pain is minimal. Some patients might feel a slight stinging or warm sensation, depending on the treatment performed.

* How soon can I resume normal activities?

V-FR's SVC™ technology lets return to your daily routine immediately following treatment.

* When will I see results?

Results can be visible from the first treatment, although each person is different.

* How many treatment sessions will I need?

Typically a three-six session treatment course is sufficient to achieve long-lasting results, depending upon the actual application needed, and each patient. Please consult with your practitioner to better understand your individual needs.

* How long do the results last?

One maintenance session is generally recommended every 6-12 months, or as required. Your practitioner can advise the best interval time, for your specific needs.

Our technology goes deep

V-FR's revolutionary **SVC™ Technology** integrates enhanced Switching, Vacuum, and Cooling mechanisms into minimally invasive fractional RF treatments.

SVC™ technology ensures your treatments are more comfortable and less painful, and that your results are the best they can be. RF energy is delivered via micro pinpoints beneath the skin's surface, creating focal heat points at the skin source. The healing process leads to the regeneration of new collagen and skin cells.

The result?

Revitalized, fresher looking skin. SVC™ gives your practitioner unprecedented control, so each procedure is personalized per patient, per treatment area, and per specific symptom and need. No matter your skin type, and no matter what part of your body you're treating, V-FR's SVC™ will give you the results you deserve.

Switching for Optimal Results

Vacuum for Better Control

Cooling for Comfort

Patient testimonials

“It took me awhile to find the right solution since I wanted to avoid a lot of unnecessary pain, but still get good results. Luckily I heard of V-FR's SVCTM technology, which helped make a difference in how I looked, without the pain.”

Gale

“My doctor said that my years smoking did a number on my skin. I'm glad that I was able to get V-FR's treatments to help repair the damage that I caused.”

Bella

“I don't have acne anymore but the scars were a constant reminder of that painful time. After having V-FR treatments I can stop focusing on the past and start enjoying my future.”

James

“As I've gotten older, I could see a difference in my skin and I didn't like it. It was as if my outer skin was aging faster than I actually was! I had a few skin resurfacing treatments and now look even younger than I feel!”

Carla
